DEMO

WHAT WE HAVE LEARNNT

API , Fake API Server

- Use API to retrieve data
- Install local API

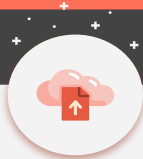

Templates

How to use and implement templates

Data-* Attributes

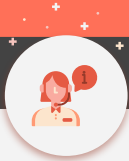

- Store custom data private, and use it as indicator

Bootstrap

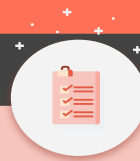

First approach to the tool using some elements and its classes

FOLLOWED STEPS

Analyze the project

Analyze requirements of project

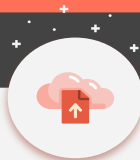

- Share the work

Divide the work in features.

- Work together

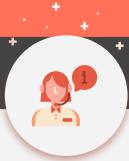

- Peer coding as well as time to investigate.

- Fix bugs

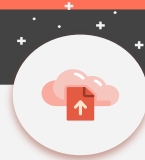

Use console and inspection on elements to detect errors

ISSUES DETECTED

API

- Patch method does not work well

Bootstrap

- Lack of tool knowledge
- Difficult to customize

Promises

- How to properly work with promises to avoid mistake alerts.
