

Blog With API

Erick Ayala
Marcel

Assembler School of Software Engineering - Promo October 2021

Lessons we've learned during this project

- Bootstrap
- APIs consuming
- json-server

Problems have you encountered when developing this project

- Bootstrap when having to adapt things our way. Modal was a huge stone in our way but we kicked it out of it.
- Fetch while not knowing how to use `async await` some return needed to be dealt with a `setTimeout()`.
